DISCLAIMER:

The information printed in this catalogue is derived from data supplied by the vendors and stored in the National database. Although every care has been taken to ensure accuracy in the production of this catalogue, the vendors, the vendors' agents, the Auctioneers or its agents, LIC, its subsidiary or its agents who collect, process or publish the information supplied; and the printer do not take any responsibility or liability for any errors, omissions or misstatements contained herein.

OSH:

Every effort will be taken by the Vendors, Auctioneers, their staff and assistants, both on the day of the sale as well as on any other visits of inspection to ensure the safety of intending buyers and visitors. However, we wish to advise that this is a farm run under normal management conditions and certain dangers exist in relation to livestock and their environment. Visitors should take all care to ensure their personal safety and children must be supervised at all times.

CONDITIONS OF SALE

FEMALE GUARANTEE: Every female shown as bred on a certain date, except any which may have been served within six weeks of the sale, is guaranteed in-calf. Every female where shown as pastured with a bull is guaranteed in-calf. This guarantee expires five weeks from day of sale.

Where this catalogue specifies an expected calving date (other than a pastured with bull expected calving date), and that date later proves to be completely inaccurate, the Vendor shall refund 25% of the purchase price direct to the Purchaser. As a basis of arbitration a period of fourteen days either side of specified calving date shall constitute the maximum tolerance allowed for calving. The 25% refund shall not apply where pastured with bull details and dates are printed in this catalogue, unless it is specifically stated that the specified calving date guarantee is to apply.

The foregoing conditions shall apply only after the following guarantees:

- Where a veterinary certificate is supplied at the date of sale certifying the female as being in-calf, no further liability will fall on the Vendor subject always to liability under other clauses contained in the Conditions of Sale and the Special Conditions of Sale. The purchaser has the right to retest at his or her own expense before delivery is made from the place of sale.
- Where a female is offered for sale as being in-calf, without a supporting Veterinary Certificate and the female is subsequently proved to be empty the Purchaser has the right to return the female to the Vendor or carry out such disposal as the Vendor may instruct and the Vendor will refund to the Purchaser the purchase price plus the transport costs only.
- Mummified Calf: Where any female sold as being in calf proves to be carrying a mummified calf, no responsibility is to be born by the Vendor.
- Yearling Heifer Guarantee:
 - a) Yearling Heifers sold as unmated, are sold with the guarantee to breed. The term to breed shall constitute to produce a calf, dead or alive. Should the heifer fail to produce a calf by 31 December 2025, the Vendor shall refund in full the purchase price.
 - Where a yearling heifer is sold as unmated, this constitutes a guarantee that the heifer is not in-calf as at the date of sale.
 - The use of MOET or IVP reproductive techniques on a female after purchase completely negates the breeding warranty.
- Any complaint to the Auctioneers must be accompanied by a Veterinary Certificate; word of mouth will not be sufficient proof.

DELIVERY: All purchases, as is customary, will be at BUYER'S RISK FROM FALL OF THE HAMMER.

PRICING: All animals are sold in NZ dollars exclusive of GST, unless otherwise stated.

ONLINE PURCHASING: You should only place a bid if you intend to buy the animal on offer at the price entered. If you place

> the winning bid where an Agency has agreed to accept the charges for any purchases made by a user in an Auction, charging will be applied to that agency for all lots purchased by the user in that Auction.

INSURANCE: If Transit or Annual Insurance is required, such cover can be arranged through the Auctioneers on

application.

INSTRUCTIONS: Purchasers are asked to sign dockets before leaving the sale and to leave full and explicit transport

instructions.

TRANSFERS: Vendors are responsible for completion of all transfers. No purchaser shall be entitled to withhold

payment for pedigree stock pending execution of delivery by the Vendor of the transfer of the same,

registrable in the Stud Book.

COMMISSIONS: If it is not possible to be present, the Company's Livestock Agents who are thoroughly conversant with

the offering will be glad to make selections or bid on specified lots according to instructions.

TFRMS: Payment by 10 days following date of sale, unless otherwise advertised.

OTHER CONDITIONS The sale is also subject to the general conditions of sale displayed at the sale.

Forward

Lodore "Red Hot Genetics" Sale

The Hutchings name is synonymous with the breeding of quality Ayrshire dairy cattle. Their reputation in the North, and around New Zealand, is fairly earned with their significant contribution to genetic influence and guardianship within our national herd.

The Lodore Ayrshire stud cattle are always impressively present to the market in preparation to make milk and looking good doing it. This year's line are very well grown with an average liveweight of 440 kgs and carrying plenty of style. It is a consistent theme to hear how well these cattle shift and with a strong type and production lineage. We're confident this high genetic offering will not disappoint and recommend you can bid with confidence.

Nigel Riddell, Link Livestock

Lodore

The current season has been quite challenging. With an exceptionally wet Winter and early Spring things got off to a slow start. Then things finally came right late Spring, and we had a great four months of good growing conditions. Since the end of January, we have had very little rain and are currently in drought conditions. As I write this, we have had some rain, so here's hoping for the start of the recovery.

We are pleased to offer another line of quality in-calf heifers for sale. Numbers are back a bit this year as we are a bit short on numbers ourselves. Also, Brian and Carolyn have decided not to sell any heifers in the Sale this year, so they can consolidate their own herd.

The Dams' have an average PW of 142. All the heifers were weighed and drenched on the 13th of March, with an average weight of 440 kgs. Up to date weights will be available by the sale date. We have included the LIC Indexes as these differ considerably to those on Animal Evaluation.

All the heifers carry AI matings and have all been vetted in-calf early. They were then run with five Ayrshire yearling bulls. Their IDs are: CHDD-22-66, 22-73, 22-117, 22-124 and 22-136. Should any replacements be kept by these bulls, DNA testing will be required.

Inspections are always welcomed, just give us a call.
